10' Wide Gable Wall.....	7'10"
12' Wide Gable Wall.....	8'2"

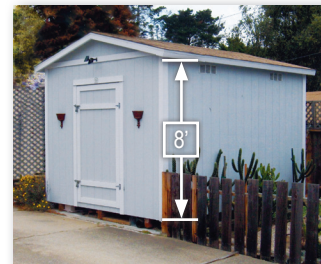

The PEAK-7 is our most popular model featuring 6'8" tall interior eave walls. This model (shown with optional window) features a roof overhang on all four sides for maximum protection from the elements as well as making the shed more esthetically pleasing. This building can accommodate our standard shed door placement on any wall you choose.

10' Wide Gable Wall.....	9'
12' Wide Gable Wall.....	9'3"

Do you need even taller walls for more cubic feet of storage space? The PEAK-8 is a taller version of the PEAK-7. This model features 7'8" tall interior eave walls which can accommodate more shelves and pre-hung house doors on either the sidewalls or end walls. The PEAK-8 also includes the roof overhang over all four sides for the best protection from nature's harshest elements.

California Custom Sheds is a family owned and operated business. Since 1984, we have specialized in quality-built wood storage sheds. We want to know what you're using your building for, so our sales staff and designers can help you create a shed to fit your needs. Our customers have used our buildings for more than just your ordinary backyard storage shed. Many have customized our sheds to be their potting sheds, tack rooms or hobby & train rooms. Some have used our buildings to park their motorcycle, golf cart, or ride-on lawn mower. Others have built them to use as an extra room, paint studio, backyard office, guard shack or a dry shelter for a favorite pet.

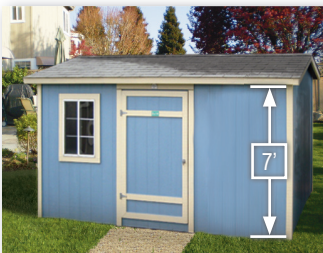

The TALL GAMBREL 6' and 7' are designed for upper lofts for additional overhead storage. These models feature your choice of 6' or 7' tall sidewall panels, a Skylite/Vent and 2 Wall Vents..... all included in the price! This model is also available with eight foot tall side walls.

We now have 27 buildings on display which will show you the quality of our sheds and give you many ideas you can apply toward your own building.

Once you make the final decision on a building, we will make an appointment to come to your home or business and construct your shed in just one day. After completion we will leave your site cleaner than when we arrived if that is possible.

Whatever your needs may be, visit us at our display lot located on Hwy 101 & Ralph Lane in Salinas and we will be happy to help you customize a building to fulfill your needs.
